

CX Intelligence Suite

AI-enabled customer experience analysis for faster, sharper, leadership-ready decisions.

NPS AI Analyzer

Version 24.6 UAT

12 Account Pilot

What the tool does

CX Intelligence Suite reads account survey data, applies NPS and CX statistical logic, and generates leadership question responses that help teams identify performance movement, risks, drivers, and action areas.

From raw survey data Upload survey and lookup files, map columns, apply business rules, and run analysis in a guided flow.	To decision-ready insights Review NPS, sentiment, drivers, manager / agent views, and leadership questions in one intelligence hub.	Validated through UAT Testers will confirm clarity, accuracy, usefulness, and readiness across 12 participating accounts.
--	---	---

What UAT will validate

End-to-end launch from ZIP package | Upload and mapping flow | Business rule clarity | Analysis output quality | 100 leadership question responses | Ambiguity, defects, and improvement opportunities
